### “You’re Kidding….Another New Classification of Periodontal Disease?”

**David Okano, DDS, MS**

The first change in the classification of periodontal conditions since 1999 was introduced in June 2018. It is a complete paradigm shift in which the diagnosis of periodontitis and peri-implantitis are now defined. This fast-paced program based upon the recently released *Classification of Periodontal and Peri-implant Diseases and Conditions* will focus on the Staging and Grading of Periodontitis as applied to billing.

Dr. David Okano is an Associate Professor at the University of Utah School of Dentistry. Before that he was in full time practice of periodontics in Rock Springs, Wyoming. Dr. Okano is a past-president of the Wyoming Dental Association and is an officer in the American Academy of Periodontology.

---

### The PPO Game: Play to Win!

**Ben Tuinei**

- Proven Strategies on appealing denied claims
- Methods on reducing insurance administration within the office
- Secrets insurance companies do not want you or the public to know about claim denials
- How to stay ahead of undermining actions by insurance carriers (where insurance tries to sour the trust your patients have in you)
- How to police illegal actions by insurance companies

Mr. Tuinei currently serves as president of Veritas Dental Resources and sits on the board of directors for The Dental Business School, and a co-host on The Navigating Dental Insurance Podcast. Mr. Tuinei has been recognized by several state Dental Associations and various dental study clubs as “The Authority” on PPO strategies and PPO fee negotiating.

---

### “Oral Surgery Techniques for the General Dentist”

**David Anderson, DDS, MD**

- What to do and what to refer
- Full thickness mucoperiosteal flaps (envelope and trapezoid)
- Simple and surgical extractions: Techniques General Dentists can master
- Bleeding management techniques

Understand patient selection and what types of surgeries to do and when to refer. Understand the principles of full thickness mucoperiosteal flaps and simple and surgical extractions. Learn ridge preparation techniques in preparation for dentures. Learn simple socket preservation techniques. Manage bleeding problems during oral surgery.

Dr. Anderson is the director of Oral and Maxillofacial Surgery at Roseman College of Dental Medicine. He obtained his dental degree from Creighton University Dental School and completed an Oral and Maxillofacial Surgery residency and a MD degree from State University of New York.

### The Hygienist’s Guide to Periodontal Problems

**Jeremy Manwaring, DMD**

- Understand patient selection and what types of surgeries to do and when to refer
- Understand the principles of full thickness mucoperiosteal flaps and simple and surgical extractions. Learn ridge preparation techniques in preparation for dentures. Learn simple socket preservation techniques. Manage bleeding problems during oral surgery.

Hygienists are on the front line to detect their patient's periodontal issues. Our patients need good hygienists to promote better oral health. The training in this session will help all hygienists recognize different periodontal conditions and learn the treatments to remedy the issues and restore periodontal health.

- Learn how to save periodontally involved teeth
- Recognize muco-gingival defects and treatments
- Recognize periodontal osseous defects and how to treat these issues
- Understand options to treat the hopeless tooth

Dr. Jeremy Manwaring is Board Certified in Periodontology and Implantology. He graduated from Tufts University of Dental Medicine with his DMD, an M.S. Degree and a Periodontal Certificate. During dental school he practiced as a hygienist where he found his love for all things periodontal.
